ABSTRACTED-PUB-NO: KR2003003185A

BASIC-ABSTRACT:

NOVELTY - Provided is a shoulder joint for mannequin which makes the arm revolve 360 degrees as well as moving up and down at a certain degree, so that various situations are expressed in displaying fashion pieces.

DETAILED DESCRIPTION - The joint comprises: the first fixing part(1); the revolving part material(3) which is shafted with the axis(2) and the first fixed part(1); the second fixing part(5) which is hinged to the above revolving part material(3) and fixed to the arm(2) of the mannequin; a rib(11) with a long hole(12) protruding outside from the bottom middle part of the revolving part material(3); a hole(15) at the above second fixing part(5) corresponding to the above rib(11); a

guide(16) next to the section of the above hole(15) and a pin(19)  
going through the hole of the guide(17) and the long hole(12).
